1 Background

RPI-IDF labels are not designed to generate multi page labels for products containing more than one package. Plant pots with saucers should have both plant pot and a saucer labeled at supplier; therefore, this document describes how RPI-IDF label should be modified by a supplier to fulfill the requirement and make available both plant pot and saucer to be labeled while IKEA is working on improvement of RPI label solution.

2 Label on saucer

Modification: add " 1 (2) " above article number, as shown in Figure 2.
