

The purpose of this marking document and connected in PDOC is to paste a label with max temperature information on jugs, carafes and jar with tap made of glass, there it's not possible to have it permanent marked, like embossed in tool or similar and there we see a need.

Paste one of the labels shown below on outside bottom of the product. Create label according to below instructions, label size, font and font size or use the originals on page 3.

The requirement on label should comply to IOS-PRG-0019.

The label can be pasted either separately or merged together with the bar code label to be as one label.

On next page there is an overview of examples on how to merge the label to a bar code label.

**Max
50°C
(122°F)**

Label size: 15x13mm
Font: Noto IKEA Latin
Font size: 8 pt

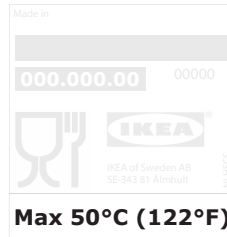

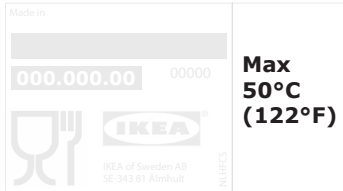

Max 50°C (122°F)
