

## BUYING GUIDE

# SILVERÅN

## Bathroom furniture

### CARE

Wipe furniture clean with a cloth dampened in water or a non-abrasive detergent, then wipe dry with a clean cloth.

The wash-basin and mixer tap should be wiped clean with a cloth dampened in water or a non-abrasive detergent.

Wash-basins in ceramic are resistant to most chemicals, except for strong acids and strong alkalis.

Wash-basins made of crushed marble should not come in contact with ammonia, acids, strong detergents, hair dye or chlorine.

### SAFETY

Some of this furniture must be fixed to the wall with the enclosed wall fastener. Different wall materials require different types of fixing devices. Use fixing devices suitable for the walls in your home (not included).

SILVERÅN bathroom furniture helps you make use of every square centimetre of your bathroom. Depending on the space you have you can choose between cabinets in different widths and depths. Complement SILVERÅN with one of our smart taps and LED bathroom lamps and you will also save water and energy!

All the products (shown here) may not be available at the store. Please contact the staff or look at [www.IKEA.co.id](http://www.IKEA.co.id) for more information. For more detailed product information, see the price tag and the Internet. All units require assembly. IKEA Indonesia reserves the right to adjust our prices, to correct price errors or misprints according to any changes beyond our responsible control. IKEA Indonesia tries to ensure that all information stated is correct at the time of publishing.

# HOW TO CHOOSE

1. Start planning your bathroom by thinking about the wall space you have available for a wash-basin cabinet and wash-basin, since this is the centre of most bathroom activities. The SILVERÅN series comprises wash-basin cabinets of different sizes and storage capacities.

After you have decided on the size of the wash-basin cabinet, you can choose between white and light brown finishes. The light brown finish is not available in all functions and sizes, see more detailed information on pages 3 and 4.

2. IKEA wash-basins come in different sizes and materials. The wash-basins suitable for SILVERÅN are made in ceramic.

Ceramic wash-basins have a glazed finish and are easy to clean. They have excellent scratch resistance and are very durable.

All wash-basins come with a water trap and strainer, with the exception of TÄLLEVIKEN and TYNGEN which come without a water strainer. The water trap is flexible and can be connected to both washing machines and dish-washers.

3. You can find a wide selection of wash-basin mixer taps at IKEA. Choose your tap based on function and design. All taps come with a strainer kit, with the exception of OLSKÄR. All taps at IKEA have water-saving device,

uses 50% less water but ensures that the water flow stays the same.

Most of our taps have a special function – a cold water start that helps you save energy. Usually, you turn on an ordinary tap by lifting the lever straight up, which releases both cold and hot water. But often, the hot water does not reach the entire way out and stops in the pipes. When you lift the lever straight up on a tap with a cold water start function, only cold water is released, which reduces any waste of hot water. To release the hot water, you lift the lever to the left.

4. The wash-basin cabinets can be mounted to the wall with or without supporting legs.

5. Now it's time for you to choose what to put above and around your wash-basin: mirror with shelf, mirror cabinet, high cabinet with mirror door, high cabinet, corner unit, storage bench. The combination possibilities are endless. Make your choice based on your bathroom storage needs and space.

6. Finally, you can complete your bathroom with accessories from SVARTSJÖN and TOFTAN series. It's designed to match SILVERÅN so the look in your bathroom will be totally coordinated in colour and style.

# ALL PARTS AND PRICES
