

## BUYING GUIDE

# SKENINGE

## Track system

### GOOD TO KNOW

Maximum electrical load in one track system: 3680W

### SAFETY

In some countries electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

### One system for different lighting needs

SKENINGE track system makes it easy to customise your lighting. Choose any number of tracks and combine them as you like – in a straight line, at an angle, or in a T layout. Use different spotlights or mix spotlights and pendant lamps. Install the track system in all rooms to create ambient lighting, work lighting and accent lighting. The system is so flexible that it blends in everywhere – even at the office, in a store, or in a restaurant.

All the products (shown here) may not be available at the store. Please contact the staff or look at [www.IKEA.co.id](http://www.IKEA.co.id) for more information. For more detailed product information, see the price tag and the Internet. All units require assembly. IKEA Indonesia reserves the right to adjust our prices, to correct price errors or misprints according to any changes beyond our responsible control. IKEA Indonesia tries to ensure that all information stated is correct at the time of publishing.

# HOW TO CHOOSE

## 1. Create your own lighting system

Start by thinking about where you want your light and how much light you need. You can connect as many tracks and spotlights as you like. The maximum electrical load in one track is 3680W. Remember that different ceiling materials require different fittings. Always choose screws that suit the ceiling in your home.

## 2. Connect to the power supply

The track system can only be installed in the ceiling. Please remember that in some countries electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

## 3. Add tracks, choose quantity and length

Tracks can be connected in a straight line, at an angle, or in a T layout. Choose the length that suits you. The tracks are 1 metre long, but can be cut to fit everywhere. Connect two tracks with a straight connector. Mount the track system at an angle (up to 110°) with an angled connector if you want the lighting to continue around a corner. Or mount it as a T layout with the 3-way connector. The possibilities are many, so you can always customise the system to your home.

## 4. Mix spotlights

SKENINGE track system includes spotlights of different sizes – 7 cm, 9.5 cm and 11 cm. You can add LED bulbs with a narrow beam to light up individual details, like a picture, or with a wide beam to light up larger areas, like a bookcase. The spotlights have a flexible joint which makes it easy to change the direction of the light and move them on the track if you want to change your lighting.

## 5. Combine with your favourite pendant lamp

With the pendant connector, you can connect most of our pendant lamps to your track system. This means that you can combine the light from spotlights and pendant lamps and customise your lighting. You can also group your spotlights and/or pendant lamps and connect each group to different switches (max 3), so you can turn each group on and off separately. See which pendant lamps can be connected to the track system on page 5.

# SKENINGE ALL PARTS AND PRICES

You can use SKENINGE track system everywhere in the home and for all kinds of activities. In a small room like a hallway or a dressing room, the track system can provide all the lighting. In the living room you can use it to light up your favourite pictures or a bookshelf by combining LED bulbs with different light beam widths. And if you want light for a specific activity – like eating dinner or reading – you can mix spotlights with pendant lamps.

With just 3 SKENINGE spotlights, it's easier for you to find your favourite coat, shoes, and hat when you are on the way out. Direct a spotlight on the wardrobe, one on the shoe rack, and use one to provide general light in the hallway. Choose light bulbs with wide beam angles which provide enough lighting to easily put on outerwear.

This combination **Rp895.000**
